

RESUME

Experienced Full-Stack Developer with +3 years of hands-on experience in the full software development lifecycle, from front-end interface creation to backend API development, ending with establishment of custom and reliable CI/CD workflows. Proven ability to work with modern JavaScript frameworks (React) and back-end technologies, including Node.js. I'm confident with working with **ANY JavaScript technologies or tools**.

OBJECTIVE

I'm seeking a challenging Full-Stack Developer position where my +3 years of experience in building web applications can be leveraged to contribute to efficient and scalable deployment. Eager to further develop my skills in AWS, CI/CD and cloud database management within a dynamic and innovative team.
